

Zafar Abbasi and Umer Khan are working on a speech recognition project.

The recording and transcription is now started. Umar will discuss some points on the project in the next week. ZafarZafar Abbasi and Umer Khan are talking about how to pick up action points and use them in the transcription andZafar Abbasi and Umer khan talk about how to use the recording that they are doing today to derive actionsWhen in the next couple of meetings, let's try and see if we are able to convert this to whatever levels into the right summBoth Google Speech recognize recognition API and assembly AI API are given what actually a 90% accuracy. If you don't have aUmer khan is working on the logic, Zafar Abbasi is doing the conversion part and as of the leaderZafar Abbasi will mail a recording to Zafar for him to work with it forward. It's 0:
